we are surrounded by thousands of animals alive and dead they are an intimate and ever present part of our human lives as a society we privilege veterinarians as experts on these animals they are our educators and teachers in what they say what they do and the decisions that they make yet within the field of education there is little research on the curriculum pedagogy and experiences of veterinary school and students what do veterinarians learn in veterinary school how do their experiences during those four years shape their perceptions of animals how do the structures curriculum and pedagogy of veterinary college create and influence these experiences learning animals opens up this conversation through an exploration of the complicated fascinating

and often painful stories of a cohort of veterinary students as they make their four year journey from matriculation through graduation the book examines how the experiences of veterinary students shape how humans relate to animals from public policy and decision making about the environment and animals slaughtered for food to the most personal decisions about euthanizing companion animals the first full length critical qualitative study of the perspectives of our primary teachers about animals this will be a thought provoking read for those in the fields of both educational research and veterinary education
